

Rivers, Rivers, Rivers

This term we have been looking at rivers.

This homework, you are going to do some research on a river of your choice.

You can choose a river in this country or a different country.

It can be a long river or a short river, a well known river or one that no one has ever heard of (not a made up one though)

Find out between 5 and 10 facts about your chosen river.

Record them like I have below, I've given you some ideas about what facts to investigate.

Have fun! 😊

River Name: River Danube

The Danube has a total length of 2,780 kilometres

Its source is in the Black Forest of Germany

The river Danube supports the supply of drinking water, agriculture, industry, fishing,

The Danube flows into the Black Sea
